REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The Examiner finds Applicants' arguments on pages 7-9 of the "Reply Under 37 C.F.R. § 1.116" filed 13 June 2005 concerning a directory server persuasive as applied to independent claim 1. The combinations of prior art from Stokes et al. ("The LDUP Replication Update Protocol"), Cai et al. (U.S. Patent Application Publication No. 2001/0016880), and Shaheen et al. (U.S. Patent No. 5,434,994) neither render obvious nor anticipates the combination of recited elements in light of claim 1. In particular, the combination of Stokes, Cai, and Shaheen does not render obvious the limitation "the plurality of pluggable services comprises an incremental update algorithm service comparing a first replica update vector of the supplier server and a second replica update vector of the consumer server to order an update sequence from a change log."

2. The Examiner finds Applicants' arguments on pages 7-9 of the "Reply Under 37 C.F.R. § 1.116" filed 13 June 2005 concerning a method for replicating data in a directory server having a dupliier server and a consumer server persuasive as applied to independent claims 13, 28, and 29. The combinations of prior art from Stokes et al. ("The LDUP Replication Update Protocol"), Shaheen et al. (U.S. Patent No. 5,434,994), and Bahl (U.S. Patent No. 6,782,398) neither render obvious nor anticipates the combination of recited elements in light of claims 13, 28, and 29. In particular, the combination of Stokes, Shaheen, and Bahl does not render obvious the limitation "the plurality of pluggable services comprises an incremental update algorithm service

comparing a first replica update vector of the supplier server and a second replica update vector of the consumer server to order an update sequence from a change log."
